

DiaBuddy Design System - Edited

1. Design Philosophy – Refined

- **Empathetic & Human:** Use soft shadows, rounded corners, and gentle animations to reduce cognitive load.
- **Clarity & Simplicity:** Avoid unnecessary text or clutter; each card and input should have a single purpose.
- **Consistency:** Maintain identical patterns for tracking, notifications, and social interactions.
- **Accessibility:** Include color-blind friendly palette and scalable fonts.
- **Trust & Motivation:** Use subtle micro-interactions to reinforce positive behavior (e.g., glucose level logging).

2. Color System – Expanded
